About HERON

HERON is a leading international health outcome, pricing and market access consultancy focused on enabling the healthcare industry to realise the value of its drugs, devices and other products. HERON specialises in providing highly scientific evidence to meet the needs of our Swedish and global clients. This includes systematic reviews, economic evaluation and pricing and reimbursement intelligence.

HERON thrives on being the best in its field. We embrace innovation and understand the value it brings. We have an unrivalled human resource make-up of health economists, statisticians, mathematicians, evidence-based medicine specialists and pricing and reimbursement experts. We're passionate and driven and, above all, we believe that anything is possible with a little imagination and a lot of know-how.

HERON is proud of its development culture where analysts can expect a steep learning curve that will give them significant senior exposure; where they will be a key part of the team and will be vital in solving real client issues.

Role objectives and aims

The Health Outcomes Analyst role is postgraduate/graduate entry level position with the opportunity to work on a wide variety of projects across HERON's service areas, supported by experienced consultants, senior analysts and technical leads. Work is project based, for external paying clients or internally for HERON.

Objectives of the role will be to:

1. Provide high quality, timely, scientific/strategic solutions to meet client needs
2. Systematically search for and synthesise disparate qualitative and quantitative healthcare evidence, and interpret meaningfully
3. Develop or refine health economic models, using appropriate software tools, to understand the economic value of clients' products
4. Conduct and analyse primary and secondary research, which will shape the development of strategic recommendations
5. Write, refine, review and critique sections of reports, journal manuscripts, conference abstracts, reimbursement dossiers and submissions for client or external delivery

You will need good interpersonal skills, a strong team-working ethos but also the ability to work independently.

Your profile

- Essential: first university degree in either life sciences, mathematics or statistics
- Highly desirable: Postgraduate qualification (PhD/MPh/MSc) in natural sciences, health economics, medical statistics, epidemiology, public health, mathematical modelling or related subjects
- Training and/or experience in the health care delivery field and/or health economics and/or outcomes is an asset

Other qualities:

- High analytical ability
- A high degree of written accuracy and attention to detail
- Communication skills, especially in the relaying of technical information
- Self-motivation, ambition and flexibility
- Strong computing skills (MS Office)
- Keen interest in medical research, provision of healthcare and the pharmaceutical industry
- Experience of software: Stata, R, WinBUGS

Your reward

- Salary Band: competitive
- Performance Review: 6 months
- Salary Review: annually
- Eligible for company and performance related bonus [based on company performance]
- Training

Your Base

You will be based in Heron Evidence Development AB offices. Currently the Nordic office is located in the Stockholm city centre. Most work will take place within the office. You may be required to travel externally for training, client meetings or other business purposes.

How to apply

To apply, please send your CV with a covering letter describing your reasons for applying and the contribution you believe you could make to the business to vacancies@heronhealth.com. Applications are accepted until January 18, 2010.
